## About us

### What We Do

Trendsetting is the leading IT training & consulting company in China specializing in IT service management and information security. The key to our client service is our ability to integrate our know-how in the world's leading management approach with our clients' business. The close relationship with responsible government authorities, renowned certification institutions, fortune 500 companies and universities enable us to track the latest development in standards and policies, absorb successful experiences, and therefore benefit our clients in providing them with most updated and authorized information and consulting service.

### Our People

With strong backgrounds in IT industry, Trendsetting's seasoned professionals maintain original understanding and have formed special approaches in standardizing service process, lowering IT operation cost, improving risk management capability, and establishing IT service quality system.

### Our Service

Trendsetting assists our clients in implementing ITIL (IT Infrastructure Library), establishing ITSM (IT Service Management) system and ISMS (information Security Management System), and provides ISO 9000 (quality certification), ISO 20000 (IT service management certification) and ISO 27001 (information security certification) consulting services.

### Our Mission

To deliver advanced IT Management concepts and share our successful experience; to improve maturity level of IT operation management and IT project management.

## Business Continuity Management

We will provide our clients with a solid understanding of business continuity management, which is based on industry best practice and guidelines for business continuity and reviews the “Business Continuity Management – Code of Practice” released by BSI, BS 25999-1:2006. Practical exercises and instructor-led discussions will help your organization understand the benefits of business continuity management in an organization.

### BS25999 benefits

- ✓ State the comprehensive definition of Business Continuity Management (BCM)
- ✓ Describe the benefits of BS 25999 to an organization
- ✓ Identify and sequence the elements of the BCM lifecycle
- ✓ Identify how BS 25999 can assist an organization in identifying and managing potential business disruptions
- ✓ Convey the importance of business continuity to top management
- ✓ Articulate the requirements outlined in BS 25999-2:2007, Business Continuity Management - Part 2: Specification
- ✓ Describe and implement the 6 steps of the BCM lifecycle
- ✓ Implement a business continuity management system
- ✓ Utilize the best practice techniques contained in BS 25999-1

## Roadmap To BS25999

- ✓ **BCM programme management**  
Programme management is at the heart of the BCM process. Effective programme management establishes the organization's approach to business continuity.
- ✓ **Understanding the organization**  
The aim of this element of the BCM lifecycle is to assist the understanding of the organization through the identification of its key products and services and the critical activities and resources that support them.
- ✓ **Determining business continuity strategy**  
This element of the BCM lifecycle logically follows understanding the organization.
- ✓ **Developing and implementing a BCM response**  
This element of the BCM lifecycle is concerned with the development and implementation of appropriate plans and arrangements to ensure continuity of critical activities, and the management of an incident.
- ✓ **Exercising, maintaining and reviewing BCM arrangements**  
This element of the BCM lifecycle ensures that an organization's BCM arrangements are validated by exercise and review and that they are kept up-to-date.
- ✓ **Embedding BCM in the organization's culture**  
To be successful, business continuity has to become part of the way that an organization is managed, regardless of size or sector. At each stage of the BCM process, opportunities exist to introduce and enhance an organization's BCM culture.
